

Quiz 2

(5 points)

Time: 22 September 2021 at 15:00-15:30 (30 minutes)

There are 2 questions. You need to answer all two questions. Please **submit** your answers in a PDF file with a file name “**Quiz2_StudentID_FirstName Surname**” via BE Moodle class before **15:40**.

Write a paragraph to answer two questions below:

Question 1: What are the problems in water resource management? (2.5 points)

Question 2: What could be a source of inefficient allocation of land? (2.5 points)

Q₁. In water resource management there are many problems. First is Water scarcity it means scarcity in availability due to physical shortage

There are two main sources of water. Surface water is the clean water from rivers, lakes and etc. and Ground water is the water present beneath Earth's surface

Second, Access to clean water because of Drinking water that you have safe to drink at home some people have less access to this kind of water

In conclusion water resource management is important to every one to access the fresh water.

Q₂. Undervaluing environment amenities could be a source of inefficient allocation of land

If you own a flower & bees farm it may have beautiful view for everyone but

you can get only benefits of honey. The neighbors won't give any benefits from beautiful land

Some day the owner will sell the farm and build something that has greater benefits

Owner can't get the benefit from all land.
