1. The histogram is automatically created by the google spreadsheet. It should never be inferred to anything about my grading criteria. I normally look into (and take into account) everything when I make my final decision on letter grade.

2. As I've mentioned in the class, your final grade is heavily weighed by your performance in the final exam. (The exam would count for 50%.) So, if you don't do well for the midterm exam, don't be discouraged. Study harder.

3. If anyone want to talk about your exam, stop by my office between 2 pm and 3 pm on Thursday. Solution is posted in the BE moodle under topic 15. You can check with the solution first before coming to see me
