- Achieve SDGs , UNFCCC/Paris Agreement, Convention on biodiversity, ETC.
- Policy and plan on Promotion and Conservation of National and Quality Environmental .

THE GLOBAL GOALS

Mission

- 1.To build climate resilient development in all sectors at all levels.
- 2.To strengthen capacity and awareness at all levels.
- 3.To develop databases, research, knowledge, and technology.

Drafting NAP by identifying sectoral vulnerability based on geographical locations.

Climate adaptation is included in Thailand Strategy 2018-2037.

National level

- Stock taking
- Knowledge exchange
- Knowledge/ Tools/ Best practices from the International experts
- Networking etc.

Analysis

The National Adaptions plan aims to assist Thailand in being more resilient to climate change and adapting to its effects. As a result, the country will accomplish sustainable development in line with its core values, such as the sufficiency economic principle, the sustainable development pathway, and local wisdom.
