

EE325

Homework and groupwork

Details

› Homework (10 points, 5 each)

2 in total

Assigned 2 weeks before midterm and final

Submission 1 day before midterm and final exam

› Group work (20 points)

6 students in a group (total of 6 group)

1 private presentation (after midterm)

1 final report submission (after final)

Group work details

› Part 1: Introduction

- Introduce an analysis base your analysis purely on your intuition, no literature review needed.
- Social science topic. No need to be purely economics. Political or social aspects are also welcomed.
- >50 observations must be collected online with Google form, cross-sectional only.
- Specify your model, expected outcome for each variable, observation groups of interest.

› Part 2: Estimation results

- Estimate coefficients and interpret result.
- Testing hypothesis, sufficiently.
- Test all the problems that we might find running regression for a cross-sectional data. (Relaxing assumption)

Group work details

› Part 3: Discussion

- Conclusion of your work
- Implication from the empirical results
