

Essay 1 ; 1<sup>st</sup> July,2019

In this class we have a guest from BOT, firstly, she talk about CLMV which we already know from other class before. She show many graph about Vietnam is the most ranking in GDP and population and Lao PDR is the smallest.

She talk about the development policy and talk about the macroeconomic analysis and limitation, however, from many class before, Vietnam still be the main option of investor. In CLMV and ASEAN, Thai commercial bank have some branch there which mean Thai commercial bank can gain some profit there. China, the largest country in the asia, invest a lot so they try to create some rail line train. In my opinion, they do this because they want to gain benefit from other country to their country, from the train, they have the biggest gain benefit country.

She also talk about the currency of each countries ,Thai baht (THB) and US dollar are very big proportion using in CLMV countries. Now, there are improving technology a lot so it is easier to payment in ASEAN. True Money is very big firm from CP, i know this currency since i was young because i use this currency in the game. According to me I can tell that True Money also be the currency in our world, we can compare True Money with Bit Coin which very popular today.

From my point of view, nowadays, Vietnam is the most interesting country to invest from the many graph in which the guest provided. In my project, i also use Vietnam to be the country that i will research about because they have big growth economic every year, moreover, Vietnam have very high pollution emission , from my project i doing about "The effects of economic growth on air pollution in Vietnam". We interested this since we think that when we do some economic activities like agricultural, industry ,etc. ,its lead to the destroying the environmental or the Earth.

All in all, from this class, the thing that i gain for new is about the currency because the guest talk the things that i have already learn in the past but it is very useful for this class.

Essay 2 ; 3<sup>rd</sup> July,2019

In this class , we learn about sustainability development which we already learn in year one but they take the deep in reason. The sustainability also be the important subject not only in macroeconomic but also we can adjust in private firm.

There are 3 pillars of sustainability which is society economy and environment. We have to adjust like in trade off benefit of some area, we have to see positive and negative effect. If some country can done 17 goals of global, it is obviously see about the improvement of that. They categorized into 5Ps which is people prosperity planet peace and partnership. The people consist of no poverty, zero hunger, good health, quality education, and gender equality which all of these are about people life. The prosperity is consist of affordable and clean energy, decent work and economic growth,industry innovation and infrastructure,reduced inequality, and sustainable cities and communities. The planet consist of clean water, responsible consumption and production,climate action, life below water,life on land. An the last two is about peace and justice strong institutions and partnership for the goals.

Moreover, SDG also have 169 targets in which be the subset and they also have indicator which separate into three tiers and 232 indicators. The concept about leaving no one behind have in inclusive development.

In my opinion, all of these have the goals to develop our world to sustain and make our better if we can do. Each goal lead to develop in term of sustain and good for environment. If we want to develop country or firm, we also can adjust this to develop our firm and also good for environment in the same way.

Essay 3 : 4<sup>th</sup> July,2019

On this day, there are a guest from CIMB which be BE alumni. He teach about the fast forward. He talk about the information in CLMV counties and comparing in CLMV. He talk about Mae Khong river.

In Thailand, the most interesting place to invest in the future is Phisanulok province because it located in the middle of Laos,Cambodia,Vietnam,and Myanmar. It's more easy to transport by car. I think in the future this can be the center of market in this area but Bangkok still be the capital city. In Lao PDR, there are 10 special economic zones. Lao PDR be the land lock country which hard to connect by water but they still perform in the better way. Lao PDR, developing every year. Vietnam also be the country which teacher emphasis because we have to go there. Vietnam have very good in economy. The growth rate of their country is the highest in CLMV countries.

In the class, we have to debate about which country we should invest in and my country that i have to support is Lao PDR. It is obvious that Vietnam is better choice if we want to invest but we can see the advantages of Lao PDR from this debate. In my opinion, i change my idea about the Vietnam is better choice to it is about which type of investment that we want to invest. Vietnam and Laos also have advantages and disadvantages in the different ways. I think if i want to invest in agricultural product , i will chose Laos since i think Laos is more fertile and have a big mountain in which protect tai fun depression.

All in all, we learn a lot about the Laos and Vietnam in term of investor. Everything also have good way and bad way. Vietnam have very good to invest , on the other ways, they also have higher crime rate and Tai fun. We have to learn about each countries if we want to invest. We should make decision by the name of country but we have to chose by the situation or type of investment.

Essay 4 ; 6<sup>th</sup> July,2019

From this day , i have a chance to go to Chonburi and Rayong , i went to Thai-German institute and Vidyasirimedhi Institute. There are many interesting things in this trip.

Thai-German institute is the firm in which coordinate with Germany but not deal with Thai government. They create this for develop and improve the new labor in technology. There are many things in this in which i like the most is the 3D printer that very high price and can print out in iron material. The reason why they don't want to deal with Thai government is if they deal, they will work harder (the policy).

Moreover, we went to Vidyasirimedhi which i really like their innovation and i interested with the teaching principles which is doing not sitting. Vidyasirimedhi is the part of PTT firm. There are many innovation since they have a budget for student and give a freedom to student. Firstly, they talk about the professor and student and course of them. They talk about the project in the future which want to be similar to US university. There are many innovation from their student and i have some prospect to talk with them and i gain some student contract because i may use some innovation to my family business. The thing that i want to have it in the future is the radar system in the bedroom. It can be use with television and it can use to know about the sleeping cycle including the hearth rate or others. Drone is the thing in which i really like. In the past i only know drone from US brand like DJI but in this they have drone which more useful than take camera or video. They also produce some health system including the equipment for people with disabilities that connect with the brain to more easy to use and don't need to put a button.

All in all, this trip is very great experience that i have a chance to go to two places in which i can't contract them by myself. I never think i will go to this two place. In the future, i will go to Vidyasirimedhi again for sure because i really like their innovation.
