

**From the UNDP (2019) study on Tolerance but not inclusion, what is your viewpoint on this issue?
Discuss your view by including the forecasting impact on the economic sector and what policies government should implement to solve any challenges.**

To solve this problem it's about time and people's awareness as people should be able to accept the differences in each person and I think this is trending now in the present time society. If the LGBTQ got accepted by society more they might be able to reach their full potential at work and have a good impact on the economic sector.

The view of government should suggest a campaign and create awareness that each people are not the same but they all have the same right and government should also impose a policy that promotes equal rights for LGBTQ as male and female
