

Do you agree that “This pandemic will reverse the progress toward gender equality”? Why?

I disagree with the quote because gender equality has already been established in society. Moreover, the speaker mentioned that the parents would monopolize the learning material for boys over girls. This is an extremely rare case. In reality, if the condition is like what she mentioned in the video. Most of the family would share the resources based on the availability of time and the priority of the subject.

Using a country as an example, explain what policies the government of that country has implemented to address this problem.

The Thai government has decided to reduce the tuition fee depending on the type of institution. If your institution is a government institution, the reduction of tuition fee is sixty percent. In the case of private institutions, the reduction of tuition fee is five thousand baht. The implementation of the policies that helped to address the problem is to give household funds to help purchase the essential learning materials that might be needed such as an extra laptop or tablet to give the opportunity to the child ability to learn remotely.
