11. What do you expect to learn from this class?

Interplay between economy and politics, both in national and global levels.

12. What is your concern, if any, about being in this class?

My ability to convey comprehensive argument during discussions. I typically have a problem of producing speech during impromptu speaking, even though it is everyday, non-academic thing.

13. What would you suggest to enhance your learning experience while taking this class? Is

there any teaching technique that other instructors use and you particularly like? If so, please suggest.

Apart from reading and discussing (which I wish BE programme had suggested there during my first year), I hope you will introduce us about critics or debates over the frameworks learnt in class.

14. Briefly describe your career aspiration(s). List the top two choices if there are many.

Social Scientist (I cannot pinpoint exactly, but for now my interests are around Political economy, International relations, IPE, Economic Thoughts, Economic History)

15. Other comments and/or suggestions.

I was very enjoy our first class yesterday! 😊

p.s. I think I haven't told you much about my field of interests rather than Political Economy. Apart from what I mentioned in 14), my another interests (for now) is about Gender (esp. feminist issues). I also want to explore more about institutional economics and Geopolitics. Such a shame that I cannot explore all of them and pinpoint my exact interest within 4 years of undergrad ;)
