There are 2 questions. You need to answer all two questions. Please **submit** your answers in a PDF file with a file name "Quiz2_StudentID_FirstName Surname" via BE Moodle class before **15:40**.

Write a paragraph to answer two questions below:

Question 1: What are the problems in water resource management? (2.5 points)

Question 2: What could be a source of inefficient allocation of land? (2.5 points)

- Q1. there are 4 main problems in water resource management
- water scarcity - means that there are not enough water supply to our demand. this may cause by rapidly growing area or climate change
 - Access to clean water - some country, not all people can access to safe drinking water which result in causes of death and illness
 - more water demand for energy - more water had been use to generate energy due to more population
 - quality of the water - there are limited amount of water that are drinkable

Q₂ it could be

- insecure property rights - it result in opportunity cost to it potential use of it land that could be more social valuable
- undervaluing environmental amenities
 - are extra benefit from the ecosystem good & services of that land which undervalued by the landowners as they don't gain this benefit.
- incompatible land uses
-
