

1. Growth Stock is more suitable to me because I am young so I can accept higher risk that also mean higher chance to get more profit.
2. Higher earnings will cause a higher stock value. On the other hand, the lower earning will cause a lower stock value.
3. The difference between the primary capital market and the secondary capital market is that in the primary market, investors buy securities directly from the company issuing them, while in the secondary market, investors trade securities among themselves, and the company with the security being traded does usually not participate in the transaction.
4. \$ 740
