

Documentation file for Do-files and Datasets corresponding to paper titled:
« Happiness on Tap: Piped Water Adoption in Urban Morocco? »
by Florencia Devoto, Esther Duflo, Pascaline Dupas, William Parienté and Vincent Pons

Do Files

The main do-file is called **ANALYSIS_dofile_anl.do**. It calls all the other do-files one by one (one is a merging do-file, and the others generate tables).

Data Sets

There are many databases needed to run the ANALYSIS_dofile_anl.do. These databases come from five main data collection activities:

- Administrative data from Amendis
 - o groupe_connexion_anl
 - Dataset with information about who is treatment and who is control, and whether those in the treatment groups got connected to the grid, and if so the date of the connection
 - o distances_price_zones_anl
 - Contains information about the distance to the closest public tap and the pricing schedule for the BSI connection
 - o spillovers_anl
 - Contains information about the share of treatment households within 20 or 50 meters radius. Also contains information about whether households had gotten connected to the grid by August 2009.
- Baseline survey (English translation attached)
 - o baseline_menage_hhid_anl
 - o baseline_roster_hhid_anl
 - o sexe_age_ref_anl
- Endline survey (English translation attached)
 - o endline_ACD_hhid_anl
 - o endline_BDEFKLM_hhid_anl
 - o endline_colis_anl
 - o education_endline_anl
- Illness Diaries (Template attached)
 - o suivimaladies_decembre07_corr_anl
 - o suivimaladies_aout08_corr_anl
 - o suivimaladies_mai08_corr_anl
 - o suivimaladies_novembre08_corr_anl
- School Diaries (Template attached)
 - o scolarisation_baseline_anl
 - o scolarisation_endline_anl
