Write a paragraph to answer two questions below:

Question 1: What are the problems in water resource management? (2.5 points)

Question 2: What could be a source of inefficient allocation of land? (2.5 points)

Question 1

Answer There are the problems of the management in water resources ;

- ① first, Water scarcity, there is up to the climate change and the plantation expanding rapidly so this is not enough for the demand of the people.
- ② second, people are hardly to access clean water. People need to drink water for everyday but the water need to be clean and safe because it can lead causes of the death among the children.
- ③ Third, Water demand is growing at alarming rate. In the economic activity as particularly relevant due to their high water use.
- ④ Fourth, Water quality. Many of fresh water are polluted. so this lead to the problem of limited amount of drinking water.

Question 2

Answer If you owned a land that you want to develop your land to a golf field but it's located in suburb area so customer are hard to get to your golf field so the owner can separate the portion of the land to build a house for sell to a group of customers that love to play golf and also looking for a house in that area so the owner of the land can get a two benefits from your own land.
