Note: - Pre-registration for EE300 is only needed to ascertain that we have sufficient number of internship advisors for each student. Please state your plan on the internship in the BE portal EE. Students can do the internship and enroll in EE300 during the first or second semester of seniors year. To enroll in EE300, students need to confirm their accepted internship position three weeks before the registration period of each semester. Please check for the internship process from the internship section in BE portal or <https://sites.google.com/econ.tu.ac.th/ee300-beinternship>

- Courses with insufficient enrollment will be closed.

- We reserve the right to reduce the maximum number of cap sections per course to match with students' pre-registration demand. When the total demand can be fulfilled by one section, the second section may not be offered.
