

Chapter 3

Job-Order Costing

Exercise 3-1 (10 minutes)

The estimated total manufacturing overhead cost is computed as follows:

$$Y = \$466,000 + (\$3.00 \text{ per DLH})(40,000 \text{ DLHs})$$

Estimated fixed manufacturing overhead.....	\$466,000
Estimated variable manufacturing overhead:	
\$3.00 per DLH × 40,000 DLHs.....	<u>120,000</u>
Estimated total manufacturing overhead cost	<u>\$586,000</u>

The predetermined overhead rate is computed as follows:

Estimated total manufacturing overhead.....	\$586,000	
÷ Estimated total direct labor hours (DLHs)...	40,000	DLHs
= Predetermined overhead rate	\$14.65	per DLH

Exercise 3-2 (10 minutes)

Actual direct labor-hours	12,600
× Predetermined overhead rate	\$23.10
= Manufacturing overhead applied.....	\$291,060

Exercise 3-3 (10 minutes)

1. Total direct labor-hours required for Job A-200:

Direct labor cost	\$120
÷ Direct labor wage rate per hour	\$12
= Total direct labor hours	10

Total manufacturing cost assigned to Job A-200:

Direct materials	\$200
Direct labor	120
Manufacturing overhead applied	
(\$18 per DLH × 10 DLHs).....	<u>180</u>
Total manufacturing cost	<u>\$500</u>

2. Unit product cost for Job A-200:

Total manufacturing cost	\$500
÷ Number of units in the job	50
= Unit product cost	\$10

Exercise 3-6

1. Cost of Goods Manufactured

Direct materials:

Raw materials inventory, beginning	\$24,000	
Add: Purchases of raw materials	53,000	
Total raw materials available	77,000	
Deduct: Raw materials inventory, ending	6,000	
Raw materials used in production	71,000	
Deduct: Indirect materials included in manufacturing overhead	8,000	\$ 63,000
Direct labor		62,000
Manufacturing overhead applied to work in process inventory		41,000
Total manufacturing costs		166,000
Add: Beginning work in process inventory		41,000
		207,000
Deduct: Ending work in process inventory		38,000
Cost of goods manufactured		<u>\$169,000</u>

2. Cost of Goods Sold

Finished goods inventory, beginning	\$ 86,000
Add: Cost of goods manufactured	169,000
Cost of goods available for sale	255,000
Deduct: Finished goods inventory, ending	93,000
Unadjusted cost of goods sold	162,000
Add: Underapplied overhead	8,000
Adjusted cost of goods sold	<u>\$170,000</u>

Exercise 3-7

- | | |
|---|------------------------|
| 1. Actual direct labor-hours..... | 8,250 |
| × Predetermined overhead rate | <u>\$21.40</u> |
| = Manufacturing overhead applied | \$176,550 |
| Less: Manufacturing overhead incurred.... | <u>172,500</u> |
| Manufacturing overhead overapplied | <u><u>\$ 4,050</u></u> |
2. Because manufacturing overhead is overapplied, the cost of goods sold would decrease by \$4,050 and the gross margin would increase by \$4,050.
