(1) Do you agree that “This pandemic will reverse the progress toward gender equality”? Why?

I am agree because as the video said many country in the world have more woman work in a frontline of the health care profession for example in Thailand we can see more woman work as a nurse compare to men. Therefore without enough compensate for this group of worker it can lead to more gender inequality problem.

(2) Using a country as an example, explain what policies the government of that country has implemented to address this problem.

For example in France. In 2019 the support fund for feminist organization has been announced it will offer €120 million over 3 years (2020 - 2022) to finance the work of feminist organization all over the world. This policy aimed to help promote gender equality.
