

## Quiz 2

(5 points)

Time: 22 September 2021 at 15:00-15:30 (30 minutes)

There are 2 questions. You need to answer all two questions. Please **submit** your answers in a PDF file with a file name “**Quiz2\_StudentID\_FirstName Surname**” via BE Moodle class before **15:40**.

Write a paragraph to answer two questions below:

**Question 1: What are the problems in water resource management?** (2.5 points)

**Question 2: What could be a source of inefficient allocation of land?** (2.5 points)

Question 1: What are the problems in water resource management? (2.5 points)

In my opinion, the problems in water resource management is the source from water isn't cover the demand for use. You can see the main water sources that we use is come from only surface water and Ground water. So, it will become many problem from that such as water shortage. However, many people still waste and don't care about water pollution.

So, its will be great if we can generate or reuse the water to make more amount of water to respond the demand for water. And campaign to stop waste and ruin the water.

Question 2: What could be a source of inefficient allocation of land? (2.5 points)

Something the you desire to use or make something its doesn't mean its will useful for other people.
