

1) From the UNDP (2019) study on Tolerance but not inclusion, what is your viewpoint on this issue? Discuss your view by including the forecasting impact on the economic sector and what policies government should implement to solve any challenges.

I agree with the statement of "Tolerance but not inclusion".  
Most of the time, every one will accept the LGBT but not in their families.  
In the perspective of economic impact, since LGBT in the labor market got job application rejection and work place harassment, the LGBT group will not be able to use their abilities, skills, and knowledge at work, so it will decrease in economic productivity. Moreover, indirect effects such as injuries from physical violence or the negative mental health effects of discrimination will result in poorer health for LGBT workers, resulting in reducing in reduced work efficiency.

Government should consider policies that show the respects of human rights standards on non-discrimination, including by:

- Prohibiting discrimination against LGBTI adults, adolescents and children in all contexts - including in education, employment, health care, housing, social protection, criminal justice.
