

Overall score at midterm

Some points to consider:

1. Based on this assuming that (i) those not attending the midterm will withdraw; (ii) performance does not change throughout the rest of the course
 - a. Nine of you will fail. But most can still recover.
 - b. As for the rest of the class, based on the current distribution, there is *not* a lot of D and D+.
2. As such, it is important to
 - a. Participate. Remember the graph I showed you after the midterms. Those that participate seems to have better overall understanding of class materials.
 - b. Spend time on the problem sets. Those that did well tend to do better in exams (remember the points of the exams).
3. For those of you who are failing at this point, but *did* attend the midterm, it is possible to save this course and not spend the next semester on EE212 again. But it would demand hard work.
4. I am always at your disposal if you would like to meet for advices.

NO.	Student I.D.	PS1 (20)	PS2 (20)	Midterm (30)	Total midterm (45%)	Out of 100%
1	6104820011	10.65		4.00	7.99	17.76%
