Preliminary outline:

The origin and meaning of the name: We'll start by explaining what is the black death because many people who know what the name means but don't know much about its origins and information

Social and economic impact: It is divided into each era, each continent in which the disease has spread and affected various social, living and economics in which it is faced.

Impact on Thailand: Many people do not yet know that the black death disease occurred in Thailand, so we are going to explain the cause and effect on Thai society at that time.

Introduction:

Nowadays, our world has the coronavirus pandemic, which is an infectious disease and can spread rapidly in many countries. Due to these situations, it makes us remind to the severe disease that was the largest demographic disaster in European history and it kills a lot of Thais as well. Moreover, many countries confront with the Black death and the Black death caused numerous effects in various ways.

Furthermore, another reason that we interested in black death disease is because one of our team member watch the Japanese anime name “boku no hero academia” in this show there are the character that wear the Plague doctor costume which that look so cool and as you see even the pandemic that occur many century ago it’s still have affect art and tv show in present time. Therefore, we want to understand how the plague affects people during moment that it existed and know more about these ancient killers.
