

## Quiz 2

(5 points)

Time: 22 September 2021 at 15:00-15:30 (30 minutes)

There are 2 questions. You need to answer all two questions. Please **submit** your answers in a PDF file with a file name “**Quiz2\_StudentID\_FirstName Surname**” via BE Moodle class before **15:40**.

Write a paragraph to answer two questions below:

**Question 1: What are the problems in water resource management?** (2.5 points)

**Question 2: What could be a source of inefficient allocation of land?** (2.5 points)

1) so the problem is the quality of the water was bad since the manufactory put the waste to the water resource so we can see that problem will link to water scarcity for the village that need the on ground water resout and second is inefficient allocation for what we can see the water was cheap so that encourage the manufacturing use too much water but if we see that the lower class need the water to allocation to them to see

Next is what in the first is said that water condition is bad and it will effect to the group that need no use a natural water source.

2) the problem is might be the first come get, a way we changed it to an inefficient location have a farm in the middle of the city that will cause a inefficient since from the pollution in the city that cause to the crop of the transportation segment and the other source the pollution that the industry might cause to the land that the place locate near the wild life that cause pollution or the taxation for the land in manufacturing is high might cause some of the factories don't obey and building in a inefficient location.
