

HW.

1.)

market supply for kidneys

2.)

How D, S increase in extreme cases.

- **demand** will increase when $\text{Price} > P_0$, because if price is P_0 or less than P_0 the demand will equal to 0, so it will not increase
- **supply** is also increase when price more than P_0 , because if price lower than P_0 there will not want to sell = 0
