

COURSE OUTLINE

EE 459 SEMINAR IN INTERNATIONAL ECONOMICS

Semester:	2/2015
Instructor	Dr. Nattapong Puttanapong Email: <i>nattapong@econ.tu.ac.th</i>
Lecture Time:	Wednesday and Friday: 8:00-9:30am
Office Hours:	Wednesday: 9.30am – 12.00pm or by appointment
Lecture Venue:	Room 303, Faculty of Economics Tha Prachan campus

Course Description:

More globalized world implies more unstable and volatile markets. As a result, the probability of experiencing fluctuation in both global trade and international financial markets gets higher. This course is aimed at broadening students' insight of international economics through various approaches, including lecture, class discussion, term paper, and seminars with guest speakers. Particularly, practices of applying analytical frameworks to the current issues and data of both global trade and international finance would enhance students' in-depth analytical skills towards more understanding of the global volatilities.

Prerequisite:

- (a) EE451 and EE452 or
- (b) By lecturer consent

Evaluation:

Case analysis I	15%
Case analysis II	15%
First draft of research paper	20%
Final version of research paper	30%
Class participation	20%

Case analysis I & II – students will be assigned to analyze and present the policy recommendations of current issues in international economics. The main objective of these assignments is to introduce the practical implementation of theoretical frameworks in analyzing impacts of the international trade in both micro and macro levels.

First draft of research paper – as a preparation toward developing individual's final paper, the student has to write a 4-page draft which describes the background, literature review, overview of research methodology and the preliminary result of his/her research paper. Also the student has to present the summary in class in order to share and discuss main contents of this proposed research with other students.

Final version of research paper – The final paper is an individual work and should not be longer than 12 pages, double-space, excluding tables and figures; it should contain only the

main points and written succinctly. The paper is to be submitted a week before class presentation. It is strongly advised that students make their plans early for the topic of the paper. The idea is, during the semester students can raise issues and questions related to their selected topic such that the treatment of the topic will provide more materials for them to write about. The extensive uses of statistical and econometrical analyses in the paper will carry extra credits.
