

1) From the UNDP (2019) study on Tolerance but not inclusion, what is your viewpoint on this issue? Discuss your view by including the forecasting impact on the economic sector and what policies government should implement to solve any challenges.

I think that the cause the inequality, that has led to this issue, is completely illogical and shouldn't be accepted. No one shouldn't be discriminated or treated differently only because they're different. These discriminations, moreover, are leading to opportunity cost and decrease in productivity of the LGBTI, since they are constrained from using their full potential. Government should implement policies that promote equality & access to services and rights in every aspects for LGBTI, such as same-sex marriage and the right to adopt children.
