

1) From the UNDP (2019) study on Tolerance but not inclusion, what is your viewpoint on this issue? Discuss your view by including the forecasting impact on the economic sector and what policies government should implement to solve any challenges.

In my opinion, the issue that occur are about the attitude of thai people towards LGBT (they are discriminated).However , recently, we are more open mind especially for people outside the family.The discrimination on LGBT leads to unequal treatment (people don't want to work). Economic productivity will decrease in both individuals and countries level (every sectors) because of unhealthy mental health so the Government should implement the policies such as supporting LGBT rights to be treated equally and not be discriminated .
