1.3 Summarize the company's overall performance compared with an appropriate benchmark you suggested from (1.2). **(15 Points)**

## Question 2

MWH Corporation purchases the inventory under the credit terms of **2/15, net 45** for the whole year. Since the company believes that it could not find advantage from taking 2 percent discount, it always takes the full 45 days to pay its bills. Thus, the average payment period is 45 days. A new member in finance department considered that there might be benefit from taking cash discount by paying on the 15th day after purchasing. However, this will require additional short-term capital. If MWH turns over its inventory 6 times each year and has an average collection period of 30 days. The company's annual operating-cycle investment is \$630 million. Assume a 360-day year.

2.1 In case that MWH takes the full 45 days to pay its bills, what is the company's cash cycle and the amount of resources needed to support the cycle? **(10 Points)**

2.2 If MWH pays its bills on the 15th date, how much is the additional short-term capital required to support the cash cycle? **(10 Points)**

## Part 5:

### **Question 2**

Win Hom Inc. reported total value of accounts receivable last year of \$1,800 million with 25% gross profit margin. It has an inventory conversion period of 50 days, an average collection period of 45 days, and a payables deferral period of 40 days. In case that Win Hom Inc. needs short-term financing, ABC Bank offers a 20-days loan contract at 12% interest rate per year, but with 30% of compensating balance and the conditions of discount interest. Assume a 360-day year.

2.1 Calculate the company's gross profit last year, cash conversion cycle, and the amount of resources needed to support the cash conversion cycle. **(10 Points)**
