Modern Arts

1. There are two things that it talked about, form and evolution. They come from the spirit that decides to develop in human soul and start to imagine new ideas. Creative Spirit or Abstract Spirit tries to find the solutions to the soul. They create a very important value in man's spirit. There are white ray and black hand which the first one represents the supporter but the second one is the one that blocks us. The idea of forms is that they were created to express the inner of someone's soul.
2. The purpose of the triangle is that it represents the way to draw human face. It includes three factors that are located on each sides of the triangle. On the first edge are the picture plane, triangle, square and circle. Second one is reality that draws the real face of a human. There are shadow and dimension in the real model. Language is the last one on the triangle; it tells the way how the human face would be. The purpose of the triangle is to educate how to draw a human face with three basic concepts and how to apply it in reality to make the good work.
3. No.5 1948 is an abstract art. The painting shows the feeling of reality of human by providing it with the volume and color. This painting is one of the first that is created as an abstract style with unique features. In my opinion, this is not my favorite one yet but it is beautiful in a way that it shows different characters and audience could be the one who translate the meaning of it.
